THINKS

Lack of awareness in web phishing

Better firewalls and site verification could have been done

SAYS

Easy access to report button would have stopped web phishing

Would have been careful if I had awareness in it

Would not be phished if the reporting process was easy

what(influencers say)

Would have not given sensitive information

# FEELS

Would have been safe if reporting was an easier task

Don't consider web phishing_ and realize after the issues happens

If proper guidelines were provided phishing would have not happenned

DOES

Provides sensitive information at phishing sites

Does not looks for "https" connection for secure connection

Just searches for the logo and finds it same and proceeds

PAIN

Impossible to recover data from phishing websites

Difficult to identify phishing website address

Very tedious process to develop a phishing detection mechanism

GAIN

Helps in identifying the phishing website

Provides better security by preventing unwanted redirection into phishing sites

Provides warning to user regarding phishing website
